Manufacturer of Classic Monster and Superhero Model Kits

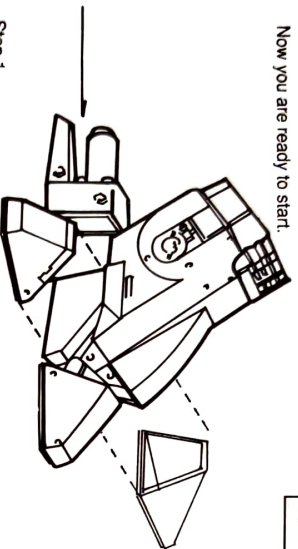

428 Boyd Street • Los Angeles, CA 90013 • (213) 687-0853 • FAX (213) 687-0659

VINYL KIT ASSEMBLY HINTS

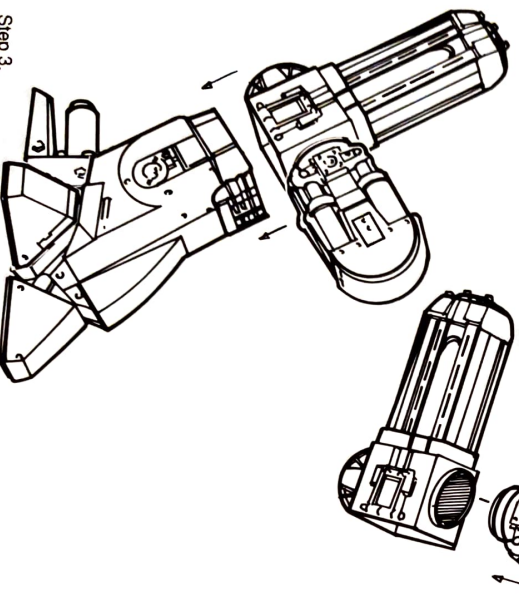

1. It is recommended to **wash all parts with soap**, such as dish washing soap. When painting, color pigment will spread more evenly, and the finished product will have a better appearance.
2. If you find collapsed or twisted parts, dip them in hot water (over 60° C/ 140°F). Within a few minutes, parts will go back to their originally molded shape.
3. **Cut off unnecessary portion of the parts** with an exacto knife, but do not cut without a plan. **It is recommended** to leave little of the unnecessary portion, and shave it as you fit the parts together.
4. **Warm parts** with a heat gun, hair dryer, or hot water to soften parts. **Insert parts while they are soft.** Do not glue, if kit is to be made posable.
5. There may be some places needed to be glued. Use a "Krazy Glue" type GLUE* with an extra-fine nozzle.
6. Because of the material, there may be an air bubble forming a hole on the surface. Use PUTTY* to fill the hole.
7. Kits are designed so that almost all the seams will be hidden. However, if you find seams that you are not satisfied with, use PUTTY*. **Be aware that the parts will be permanently bonded, and will not be posable.**
8. To color, make sure putty is completely dry, and use **water-based ACRYLIC PAINT*** only. Oil-based paint may not dry well on vinyl, and may soften the material.
9. For coloring, look at the box art for suggestions.
Now you are ready to start.

WARM PARTS! CUTTING WILL BE EASIER!

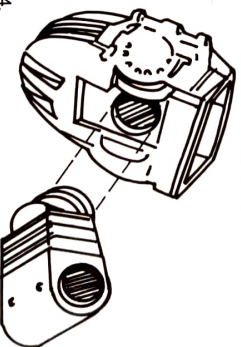

Step 1.
Glue **SLIDE** and **BACK FOOT SUPPORTS** to **BOTTOM LEGS** (right and left).

Step 2.
Snap **EXTENDING LEG CONNECTOR** together with **UPPER LEG** (right and left). **DO NOT GLUE**

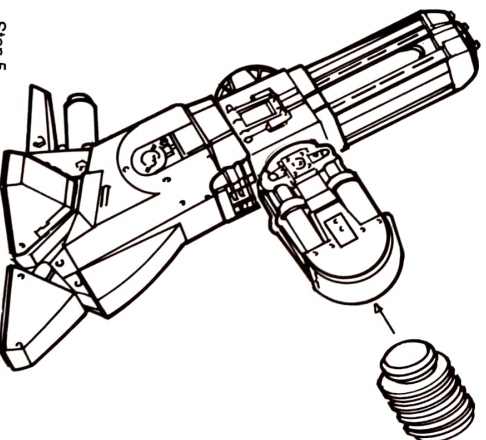

Step 3.
Glue complete **BOTTOM & UPPER LEGS** together (Steps 1 & 2).
Be Sure To Trim Carefully Where Pieces Come Together.

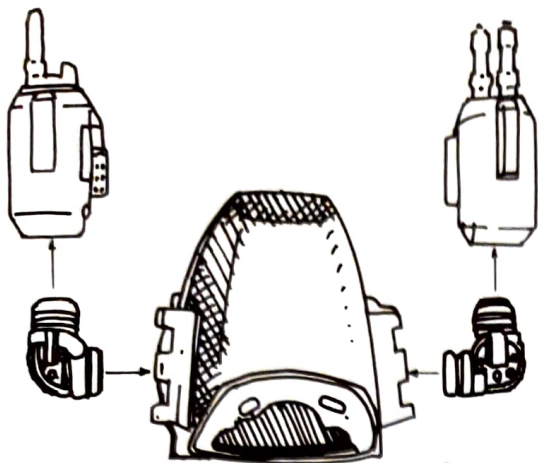

Step 4.
Snap together **FRONT BODY** and **HIP**. **DO NOT GLUE**

***RECOMMENDED GLUE:-** Any kind of "Krazy Glue"
PUTTY:- A + B Poxy Putty
PAINT:- "PACTRA Acrylic Paint"
"POLLYS, Water Based Acrylic Model & Hobby Color"

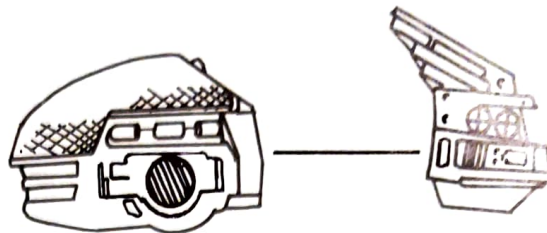

Step 5.
Snap **HIP CONNECTOR** to Complete Legs (right and left).
DO NOT GLUE

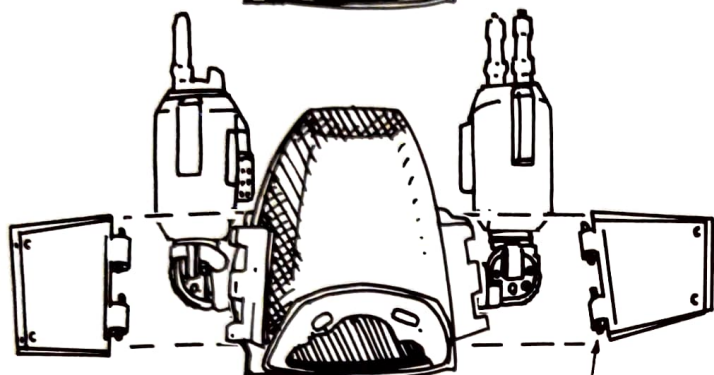

Step 6.
Snap UPPER ARM CONNECTOR and ARM together (right and left). **DO NOT GLUE** NOTE: There is no Right or Left UPPER ARM CONNECTOR; they are the same shape.

Step 7.
Snap together RIGHT and LEFT ARMS (Step 6) to FRONT BODY with Hip (Step 4). **DO NOT GLUE**

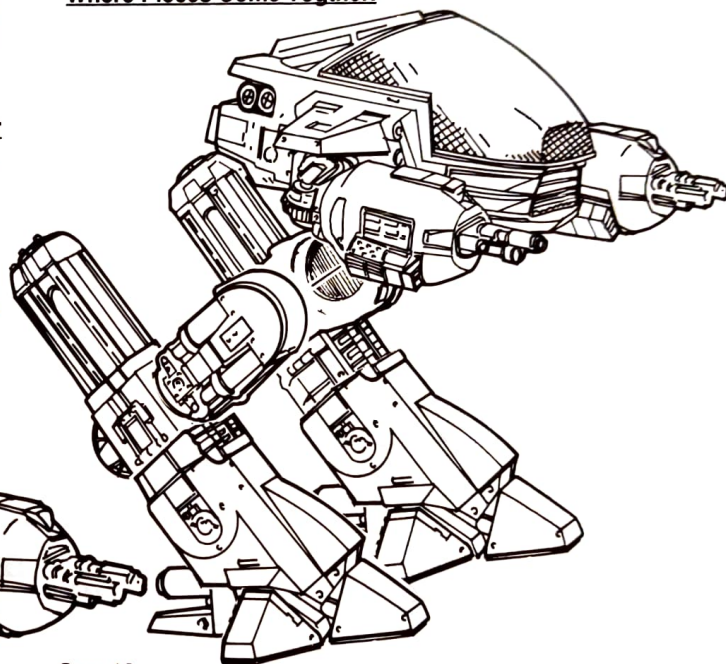

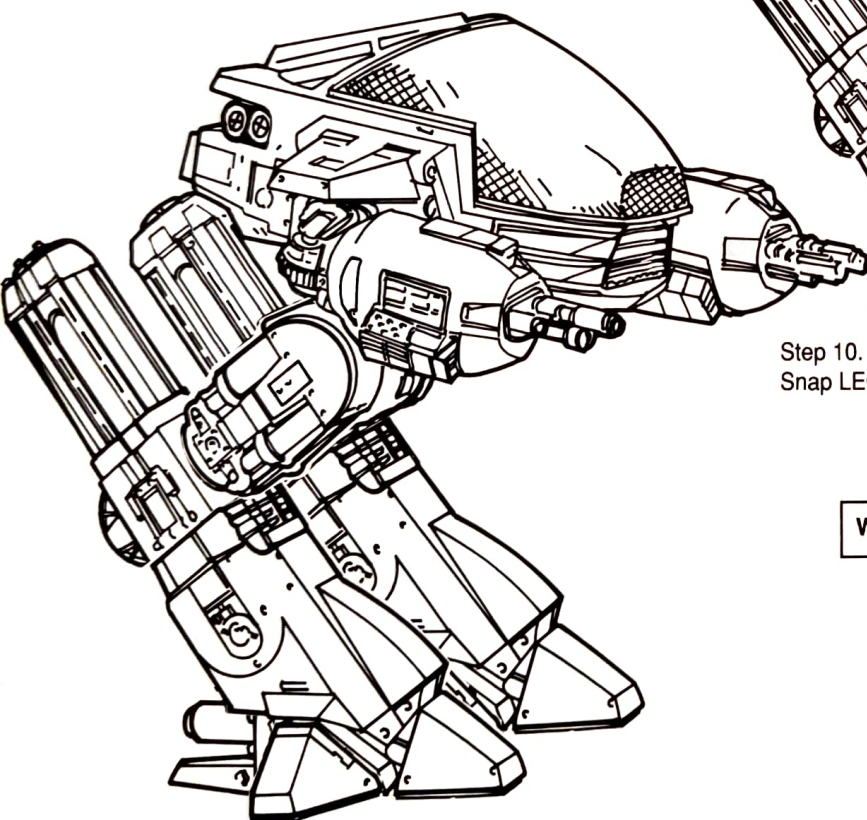

Step 8.
Glue BACK BODY TO FRONT BODY ASSEMBLY (Step 7).
For better result, before gluing two big parts together, **WARM** parts to make them more flexible. Be Sure To Trim Carefully Where Pieces Come Together.

Warm these parts or damage may occur.

Step 9.
Snap SHOULDER ARMOR to Complete FRONT and BACK BODY (Step 8). **WARM SHOULDER ARMOR BEFORE YOU SNAP THEM IN PLACE TO AVOID DAMAGING THE JOINT.**

Step 10.
Snap LEG ASSEMBLIES (Right and Left) to HIP. **DO NOT GLUE**

WARM PARTS! CUTTING WILL BE EASIER!

Step 11.
Choose your favorite pose, then **GLUE** one Complete LEG ASSEMBLY to hold the body upright.
If you do not do this, damage may occur.
